BucketList® has been selected!

The future is what WE make it, thanks to KasvuOpen and EU's FIPPP project.

Vaasa, Finland: List It's BucketList® service has been selected by the Finodex accelerator to take part in their first batch of accelerated projects. List It will receive co-funding from the EU and mentoring from Finodex to be part of EU's Future Internet charge. An ambitious initiative to put EU on the fore front of new Internet markets in 2020 and beyond.

“So... BucketList® is focusing on life's most basic questions like ‘What do I want?’ and ‘Who am I?’“. Those were some of the first words Mikko Kalliola said to us at last year's KasvuOpen. We cannot thank him and the other mentors enough for all the insight and advice they dispensed freely to us and to the other finalists. It's largely thanks to the KasvuOpen mentors (myllärit) that we have this opportunity.

Going against the current Finnish trends where focus is set on mobile games or clean energy solutions List It is the first Finnish company working with Finodex towards a brighter Internet future using the FIWARE architecture. List It is answering the call in Helsingin Sanomat's main editorial on [25.3.2015](#).

In true bucketlist spirit List It is “seizing the day”. Seizing this opportunity to develop our BucketList service, the future Internet and the future of the nation. #SuomiNousuun

About List It: List It provides the BucketList® online community. A community where people can share and get help with their life goals and aspirations. Users get advice and inspiration from a large community, where help is passed along in a new form of “pay-it-forward”. Visit <http://www.bucketlist.net> to see it in action.
